Re: CCRC Lake Project – Southern Iowa Rural Water Association (SIRWA)

Dear Commission,

Since my letter of June 27, 2022, the SIRWA Board of Directors has received further and updated information from CCRC Project Coordinator Dave Beck as well as engineers Mark Duben and Mark Fincel in relation to the CCRC lake project. At a special meeting of the SIRWA Board held July 28, 2022, the SIRWA Board resolved that:

1. SIRWA supports construction of the CCRC lake project and desires to see such project move forward at its currently planned capacity (no reduction in planned capacity).
2. SIRWA supports moving forward with completion of the water shed work required for proceeding with the CCRC lake project.
3. SIRWA will contribute additional funds toward CCRC lake project costs. However, due to the lack of information currently available to CCRC in relation to grant and other potential funding sources for this project, the specific division of remaining project costs as between SIRWA, Osceola Water Works, and other project sponsors cannot be determined until a later date.

SIRWA looks forward to continuing discussions with CCRC and others involved with the CCRC lake project in Clarke County.

Thank you,

Amy J. Skogerson
SIRWA General Counsel
